Proficient Software Engineer skilled in Java and Spring Boot, with a focus on optimizing application performance. Recognized for problem-solving abilities and enhancing user experiences, ready to contribute to impactful software development initiatives.

EDUCATION AND TRAINING

Bachelor Of Science: Computer Science, GLA University 06/2025 | Mathura

High School Diploma, Kendriya Vidyalaya No. 2 05/2021 | Mathura

EXPERIENCE

Capgemini, Software Engineer | Java Full Stack Developer 06/2025 – Present | Navi Mumbai

- Executed backend development using Java and Spring Boot to deliver robust application features
- Optimized REST API functionality through systematic debugging and enhancements to improve application scalability
- Developed enterprise-level software solutions and provided application support for critical projects
- Acquiring hands-on knowledge of production-level application architecture and software lifecycle methodologies
- Elevated application usability and frontend user experience by implementing responsive UI enhancements and organized interface design techniques

Capgemini, Software Engineer Intern 03/2025 – 05/2025 | Navi Mumbai

- Developed microservices-based applications utilizing Spring Boot framework
- Acquired industry practices in API development, testing, documentation, and debugging, contributing to team projects
- Completed intensive internship training in Java full stack and enterprise application development, enhancing technical proficiency
- Collaborated on project-based assignments, gaining exposure to corporate development environments and team dynamics.

SKILLS

Technical Skills

- Languages: Java, JavaScript, Python
- Backend: Spring Boot, REST APIs, Microservices, Spring Security, Hibernate
- Frontend: Angular, HTML, CSS, UI/UX Design, Figma
- Database: MySQL, MongoDB, Firebase
- Tools & Platforms: Git, Maven, Postman, Swagger, Docker
- Cloud & Architecture: Eureka, OpenFeign, API Gateway, RabbitMQ
- AI & CV: OpenCV, MediaPipe, Generative AI Tools

Non-Technical Skills

- Problem Solving
- Team Collaboration
- Communication
- Creative Thinking
- Adaptability
- Leadership
- UI/UX Understanding
- User-Centered Thinking
- Attention to Detail

PROJECTS

Project Hub, Tech Stack: HTML, CSS, JavaScript, Firebase

Developed a responsive project showcase platform with authentication features, enhancing frontend development and UI/UX design skills.

Hotel Management System, Tech Stack: Java, Spring Boot, Angular, MySQL, Microservices

Developed a scalable microservices-based hotel management system for handling reservations, guest management, and billing, improving understanding of enterprise architecture and secure API development.

Smart Attendance System, Tech Stack: Python, OpenCV, Firebase

Created a face recognition-based attendance system that automated attendance tracking and reduced manual effort while gaining practical experience in AI-based authentication systems.
